ABOUT CONFERENCE

Conference series Ltd invites all the scholars from all over the world to attend and present their respective scientific research at '5th International Conference on Oceanography and Marine Biology October 18-20, 2017 Seoul, South Korea' during October 18-20, 2017 Seoul, South Korea which includes prompt Keynote presentations, Oral talks, Poster presentations, Delegate views and Exhibitions.

Oceanography Congress is providing a global platform to discuss and learn about Marine Sciences, Marine Biology, Marine Geology, and Marine Oceanography, Marine ecology to exchange their knowledge, experience and research innovations. The aim of Marine Science Conferences is to create a platform for strong exchange of the recent advancement and technologies towards Marine Oceanography and Marine Biology.

Conference Series Ltd Organizes 1000+ Global Events inclusive of 300+ International Conferences, 500+ Workshops and 200+ Symposiums every year across USA-Europe and Asia with support from 1000 more scientific societies and publishes 400+ Open access journals which contains over 30000 eminent personalities, reputed scientists as editorial board members.

WHY TO ATTEND?

The conference will provide a forum for exchange of recent research results with members from around the world focused on learning about ocean/ marine research and marine biology, for discussion of future challenges in implementation and application of underwater acoustic technologies, marine pollution, marine environment and interactions, maritime law and policy and also the conference will display the latest advances in instrumentation.

Oceanographic processes include coupling across a large range of scales and linkage between a numbers of factors of different nature. In recent times that nations have begun to recognize the size, diversity and complexity of the ocean industries and their importance to all. Too many people marine equals shipping, which is indeed an important industry as the world fleet carries over 90% of the world trade by tonnage and shipbuilding is a business worth over U.S. \$32 billion per annum. Offshore oil and gas is the world's biggest marine industry where off production alone can have a value of more than \$310 billion per annum. Submarine cables are now a huge business that provides the worldwide part of the World Wide Web and enables the very existence of the internet.
