

## Conference Series LLC 26<sup>th</sup> Annual Summit on Neuroscience and Neurological Disorder May 18-19, 2020 Webinar

### Editorial Note

We had a huge success with the completion of **26<sup>th</sup> Annual Summit on Neuroscience and Neurological Disorder Webinar** on May 18-19, 2020. The significance of the meeting was achieved due to the accumulation of all the related group of spectators of research scientists to share their Knowledge, Research work, Technologies, and furthermore trade of worldwide Information towards the correct crowd at ideal time. Congress has received a generous response from all over the world. This has been organized with the aim of endorsing the development of new perceptions and ideas for investigating the high level of knowledge reached by scientific community in the field of Neurosciences.

The conference was organized around the theme "*Overwhelms the Brain Ability*". The congress entrenched a firm relation of future strategies in the field of Neurology and Neuroscience.

We would like to thank each and every participant of Neurological Disorder 2020 webinar to make this a huge success. And special thanks to media partners for the promotion of our event.

The **ConferenceSeries** Neurology Conferences aim to bring together the prominent researchers' academic scientists, and research scholars to exchange and share their experiences on all aspects of Neuro Sciences. It is conjointly a knowledge domain platform for researchers, practitioners and educators to gift and discuss the foremost recent advances, trends, and issues in addition as sensible challenges and solutions adopted in the fields of Neurology and Neuroscience.

Medicine has developed throughout time but has remained forever concerned with the maintenance of health and thus the science of prevention and alleviation, and ultimately curing, of disease. To continue its development in new directions, medicine is now looking to neurology, an emerging scientific specialty born from psychiatry, which has grown up in the fields of engineering, physics, chemistry and biotechnology, and is now moving into medicine, with huge potential for expansion and development over the next decade and beyond Neurology is a uniquely addressing the important challenges and advances in medical, biotechnology devices and molecular machine systems and neurologists. Neuroscience and Neurology is a valuable information source for all players in the field – academic, industrial and clinical researchers, pharmaceutical and biotechnology companies, regulatory authorities and others across the scientific community.
