

About the Journal

Archives of Physics Research intends to include the below topics but not limited to Astrophysics, Atmospheric & Space Physics, Atomic & Molecular Physics, Biophysics, Condensed Matter & Materials Physics, General and Cross-disciplinary Physics (including foundations), Mathematical and Computational Physics, Quantum Physics, Nanoscience, Nonlinear Dynamics & Complex Systems, Nuclear Physics, Optical Physics, Optics & Spectroscopy, Particle Physics, Physics of Plasma Condensed Matter, Relativity & Cosmology, Statistical Physics, and Theoretical Physics, etc.

The journal embraces the importance of publishing all good-quality, original research articles will be considered that are within the journal's scope, and have been conducted with scientific rigor and research integrity. The journal also features review articles, editorials, and perspectives, providing readers with a leading source of commentary and analysis.

The journal includes a wide range of fields in its discipline to create a platform for the authors to make their contribution towards the journal and the editorial office promises a peer review process for the submitted manuscripts for the quality of publishing. Physics journals impact factors is mainly calculated based on the number of articles that undergo single blind peer review process by competent Editorial Board so as to ensure excellence, essence of the work and number of citations received for the same published articles.

The journal is using Editorial Manager System for quality peer review process. Editorial Manager is an online manuscript submission, review and tracking systems. Review processing is performed by the editorial board members of Archives of Physics Research or outside experts; at least two independent reviewers approval followed by editor approval is required for acceptance of any citable manuscript. Authors may submit manuscripts and track their progress through the system, hopefully to publication. Reviewers can download manuscripts and submit their opinions to the editor. Editors can manage the whole submission/review/revise/publish process.

Why Special Issue

This special issue has been introduced to recognize those researchers who are with us from the starting of the Conference and kept their believe with us regarding the quality of the conference and the publication. Their continuous support make the Conference as well as the supporting journal to the conference successful and recognized by the international experts. Here in honor to those supporters, those speakers, those submitters, those researchers we are releasing the special issue with the abstracts accepted for the conference, full length articles submitted to the conference and with the short communication submitted to the conference.
